VINIFICATION AND MATURATION
Manual harvesting into small perforated boxes. Reception with total destemming and immediate crushing, cold maceration and clarification of the must. Fermentation was carried out in stainless steel vats in order to keep well alive the primary aromas of the grape varieties.

TASTING
At Quinta do Sobreiro de cima we selected the best grapes from Touriga Nacional and Cabernet Sauvignon varieties to create this bivarietal red wine. Fermented and aged in stainless steel in order to preserve the typicality of the varieties, we obtained a Ruby colour wine with some garnet reflections, intense aromas typical of the varieties where red ripe fruits, various spices, notes of tobacco, violets and rock-rose predominate. In the mouth it is ample, smooth balanced and with great persistence.

TRY IT WITH...
Ideal to pair with red meat and game dishes, "Trás-os-Montes" gastronomy dishes such as feijoada or roasts and cheeses of intense flavour. Should be served at a temperature of 16-18 °C.
